Education

China University of Petroleum (East China)

Qingdao, China

BS in Public Admin

June 2021

Relevant Experience

Business Systems Analyst

Grand Rapids, MI

Morrison Industrial Equipment

November 2025- Present

Served as the primary bridge between the ERP system and backend database, supporting daily operational workflows across multiple departments. Queried and analyzed live production data to troubleshoot issues, optimize processes, and ensure data integrity. Solely managed all quality control operations, including validation, reporting, and cross team coordination.

Data Analyst

Guangzhou, China

Huayu Internet Technology

December 2022 – July 2024

Supported product and feature decisions through hands-on data work. Used Excel, Python, and basic SQL to handle gameplay data, track user behavior, and generate reports for the development team. Helped identify issues in live metrics, supported balancing and monetization decisions, and prepared simple dashboards and summaries for leadership. Collaborated with developers by reviewing logs and occasionally helped with product development using C# within Unity engine.

Technical Skills

Programming Languages: C#, Python, SQL, GDScript, HTML

Tech Stack: SQL Server, Excel, GitHub, Tableau, Power BI, Pandas, NumPy, Plotly, Matplotlib, Predictive Modeling, Machine Learning, NLP, Windows Operating System, Linux, Unity, Blender, Unreal Engine, Godot

Soft Skills: Communication, Analytical thinking, Decision-making, English, Chinese, Uyghur, Turkish

Projects

NutriCraft – Data-Driven Food Recommendation System

Developed a full data pipeline for real world nutrition datasets and built a web application that recommends meals based on user specific nutritional needs.

User Sentiment Analysis With NLP

Extracted sentiment scores from review text using NLP, compared them with user ratings, and visualized their relationship. Prepared tokenized datasets for model training.
